Who Is CMP?

CMP Corporation is a leading global remanufacturer specializing in replacement refrigeration and air conditioning compressors and parts. Operating from two advanced manufacturing facilities spanning over 160,000 square feet each and an easy-to-navigate online store, we are well-equipped to offer dependable, consistent, and convenient services.

Since our inception in 1966, CMP has grown from providing parts to full remanufacturing, with over 20,000 compressors sold in the past year alone.

In 2017, the acquisition of A1 Compressor enabled us to combine the strengths of these top aftermarket brands with numerous inventory centers throughout the United States. Our commitment to delivering quality products promptly and affordably has benefited more than 3,000 customers across over 95 countries.

For over five decades, CMP Corporation has been synonymous with excellence, serving customers in regions such as the Far East, the Middle East, and beyond. Offering an extensive inventory of premium parts, same-day shipping, and competitive pricing, CMP has become the preferred supplier for HVAC and refrigeration components.

Top Tier Remanufacturing

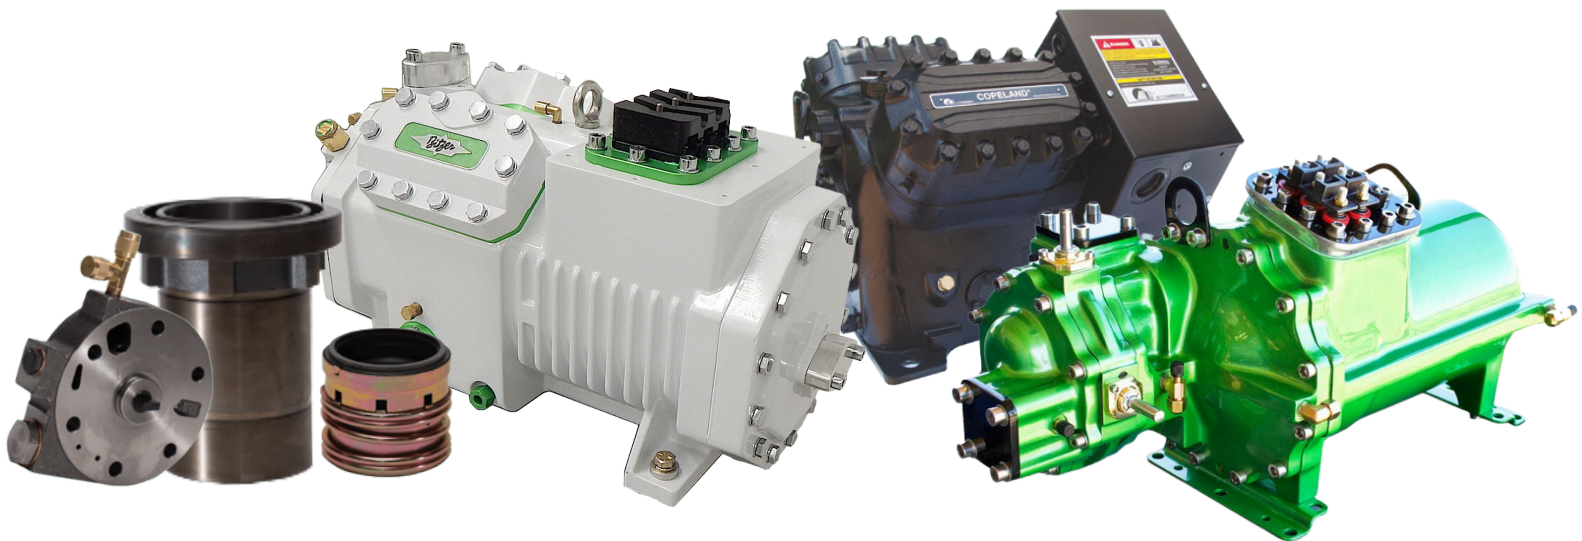

OEM Quality At Economical Prices

Remanufactured doesn't mean refurbished. Using an exclusive re-engineering process, we make remanufactured compressors with the reliability of OEM units for a fraction of the cost.

Our remanufactured compressors are meticulously reconstructed to meet original equipment manufacturer standards.

Utilizing cutting-edge technology and quality control measures ensures that each component and finished compressor is thoroughly inspected and optimized for peak performance.

This meticulous process guarantees the reliability and durability of our compressors and ensures that they are cost-effective solutions for businesses looking to maintain their equipment.

Think Green,

Think CMP

CMP's Green Initiative CMP Prioritizes an Eco-Friendly Approach in All Compressor and Parts-Related Activities to Protect the Planet's Well-Being—our commitment to Sustainability Aims to Reduce the Carbon Footprint and Inspire Others to Create a Greener World.

By choosing to invest in a remanufactured compressor, you are making a positive impact on the environment. Not only are you helping to conserve natural resources, but you are also reducing carbon emissions and minimizing waste generation.

www.cmpcorp.com

Think Green,

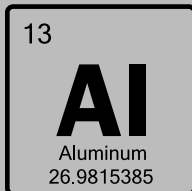

Think CMP

Every decision we make can create a ripple effect of positive change, no matter how small. Your choice to support sustainable practices is a step towards a greener and cleaner future for our planet. Thank you for being a conscious consumer and contributing to a more sustainable world.

In The Previous Year, We Achieved The Following Environmental Milestones:

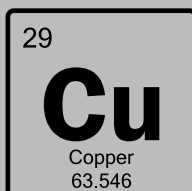

4,429 Gallons of Water Saved

12,920 lbs of Cast Aluminum Recycled

691,434 Hours of Electricity Preserved

13,300 lbs of Copper Recycled

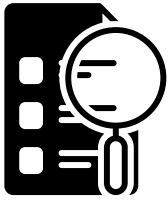

Remanufacturing Process

Disassembly Compressors are completely torn down and cleaned. All parts are removed and separated during this process for requalification or dispensation.

Part Qualification

All parts, including the cleaned core, are inspected before being considered for requalification. We use OEM standards to ensure that all components meet specifications. Worn parts like bearings, gaskets, reeds, etc., are discarded.

Assembly

Compressors are remanufactured using a combination of new and requalified parts based on OEM specifications. All requalified parts have been inspected and tested before installation.

Testing

Compressor testing includes component inspection, precision reassembly, performance tests like pressure and temperature evaluations, and a run-in period to mimic real-world conditions.

Inventory & Shipping

Each compressor is barcoded and inventoried at one of our 6 shipping locations. Our unique barcoding process allows us to digitally track inventory, which is accessible to our customers on our website and prevents shipping mistakes.

Our lean manufacturing techniques allow us to constantly seek cost-reduction opportunities in our rebuilds, which allows us to keep costs low and pass savings on to our customers.

Partner Perks - EDI Capabilities

Our advanced ERP allows electronic connections with our customers, making order management easier than ever.

With this efficient system in place, business owners can now save valuable time and resources. By automating invoice generation, monitoring shipping progress, and quickly accessing essential information, tasks that used to be time-consuming are now completed effortlessly. This seamless process allows for increased productivity and smoother operations, giving CMP customers the opportunity to focus on growth and their business.

This new initiative is part of our ongoing efforts to provide exceptional customer service. With after-hours pickup now available every day of the week, we aim to make it more convenient for you to access the compressors you require.

Whether you have urgent needs or prefer to pick up your orders outside regular business hours, we ensure you always have access to the needed products.

We understand the importance of efficiency and flexibility in today's fast-paced world and are committed to meeting your expectations every step of the way.

Additional Benefits

- Real-Time Access to Inventory, Order Tracking, Invoices, & More!
- 2-Year Warranty Standard on Each Model
- Free Technical Support & Guides Available

Thank you for choosing us as your compressor supplier, and we look forward to continuing to serve you with the highest standards of quality and service.
